

Here the classifier can be chosen. The lernern node creates model and the predictor test the data using previously calculated model.

This node is responsible for splitting data into test and training data.

X-Partitioner

Node 23

Node 22

Random Forest Predictor

Node 20

This node is responsible fo collecting and aggregating results.

X-Aggregator

Node 21

This node calculate all statistics like F-measuer and others.

Scorer

Node 18
